

Catering report.

The bar and kitchen are working well, we now have a good team in place and the 2 Christmas Carverys where well attended.

We are in the process of introducing a Celebration Carvery which will start in April where members and their wives/partners can enjoy a discounted meal in the month of their birth or anniversary. Full details will follow after the next catering meeting.

The catering committee has reviewed the returned questionnaires only 39 where returned, and there were only 4 areas where there was more than 1 comment, The coffee machine- it has now been de scaled the water temp turned up and we are in the process of changing the chocolate powder to Cadbury's. Menus - they are in the process of being upgraded and when complete we will be putting the out on the tables. Milk – we have now replaced the UHT milk behind the bar with fresh milk. The hot cabinet – now has sausage rolls and pasties available. There are other suggestions people have put forward and we are looking closely at them, thins like fine dining music nights and themed food nights to that end Janet is in the process of putting a curry night and a fish and chip night.

The Christmas Party went ahead although it was poorly attended. A good time was had by all who attended. The event is under review by the committee.

The Carol concert on 20 December was a great success raising over £700 for prostate cancer. Thank you to Tom Ringrose and the other members of the brass section for a great night, also to all the members who attended and sang their hearts out. We believe this event will take place next December as Ray has spoken to them already.

The Burns night was well attended and thanks to Paul Hocking and Shaun Farron for their contribution on the night.

The February Carvery list is on the notice board, Valentines night will be on February 16th. Blockbusters returned after the Christmas break in January, look out for notices going up for Februarys' event, Thanks to Sue and Paul Roberts for their hard work producing such a great event.
